SUMMARY

I'm a passionate software engineer with 3+ years of experience building meaningful, user-focused products that blend creativity with technology. With experience in AI-driven and cross-platform development, I enjoy turning complex ideas into simple, impactful digital experiences while continuously learning and growing through new challenges.

EXPERIENCE

PRODUCT ENGINEER

June 2024 - Present

WE OVER I

A product development collective partnering with early-stage startups to deliver end-to-end software design, engineering, and product solutions.

- Built an **AI-powered trip planner** for a Kurdistan tourism platform using MapTiler, Mapbox, and OpenAI APIs to generate personalized travel recommendations.
- Led front-end development of Storia, an **AI-powered journaling application**, contributing to its selection as **App of the Day** multiple times on the App Store and consideration for additional App Store featuring.
- Enabled **in-app subscription** functionality for the Storia app using RevenueCat, providing secure purchases and entitlement management.
- Delivered a scalable **tour and event booking platform** for a government-backed Kurdistan tourism project, supporting secure payments and ticketing for large public use.
- Implemented **interactive and animated user interfaces** using GSAP, improving visual engagement and user experience across key application flows.
- Configured **Mixpanel analytics** to monitor user behavior and feature usage, supporting data-driven product decisions.
- Developed an **iOS home-screen widget** using Expo and Swift, extending core application functionality directly to users' devices.
- Incorporated **vector databases** into the journaling application to extract patterns from user entries, enhancing insights and structuring content effectively.

SOFTWARE ENGINEER

Dec 2023 - June 2024

VAPORVM

A global technology and IT solutions company delivering cloud transformation, cybersecurity, managed services, and custom software for enterprise digital innovation.

- Managed production background services using Quartz.NET to automate **recurring jobs** and scheduled workflows.
- Applied Repository and CQRS design patterns to build modular, maintainable backend services supporting long-term scalability.
- Designed and optimized **SQL stored procedures** to handle complex business logic and improve query performance.

- Developed and maintained MongoDB data models and indexes to ensure efficient data storage and retrieval in production systems.
- Built a cloud-based support and issue management system enabling request logging, expert assignment, SLA definition, and task tracking.
- Integrated **SignalR** to deliver real-time status updates and notifications for both customers and internal support teams.

ASSOCIATE SOFTWARE ENGINEER

Sept 2022 - Nov 2023

ILI.DIGITAL

A global digital transformation company delivering custom software, AI solutions, and scalable technology products for enterprise clients.

- Developed and maintained production **RESTful APIs** using .NET Framework and FastAPI to support scalable data exchange between services.
- Worked with **PostgreSQL and SQL Server databases**, ensuring reliable data storage, optimized queries, and performance-focused schemas.
- Contributed to **Volocopter's VololQ** Flight Planning and Management System supporting the **world's first certified eVTOL aircraft**, building route validation logic, performance modeling components, and system integrations.
- Developed responsive user interfaces using React, connecting backend APIs to deliver complete user-facing features.
- Implemented **Role-Based Access Control (RBAC)** in Django applications to enforce secure, role-based access to system functionality.
- Collaborated with clients and product owners to translate requirements into technical solutions and ensure clear communication throughout development cycles.
- Integrated **feature flag management** using Flagger within Django applications, enabling controlled feature rollouts and configuration changes.

EDUCATION

Bachelor of Sciences in Computer Science

GPA: 3.6

Punjab University College of Information Technology (2018 - 2022)

Higher Secondary School (Intermediate FSc)

Percentage: 85.0%

Punjab Group of Colleges (2016 - 2018)

Secondary School (Matriculation)

Percentage: 90.4%

Beaconhouse School System (2014 - 2016)

SKILLS

- **Languages and Frameworks:** React.js, React Native, JavaScript, TypeScript, Expo, Next.js, .NET, FastAPI, Django, GSAP, Python, C#, SQL, Swift
- **Tools & Technologies:** PostgreSQL, Mixpanel, Flagger, SignalR, Mapbox, MapTiler, OpenAI API, Prompt Engineering, Weaviate, MongoDB, Quartz.NET
